CETP 2.2 – Bobtail Delivery Operations

Propane Delivery includes inspecting, maintaining and operating propane delivery vehicles, filling propane storage containers, and making customer deliveries of propane.

- Bobtail Delivery Operations

Bobtail Delivery Operations course provides information for drivers who operate commercial motor vehicles to deliver propane. This course also covers: Bobtail equipment and systems.

Explains a bobtail's basic equipment and systems, including the cargo tank, gauges, valves, pumps, meters, delivery hoses and emergency discharge control equipment. Presents detailed procedures for safely loading a bobtail using the plant pump. Discusses DOT requirements for bobtail inspections. Reviews the features and installation requirements of ASME tanks at customer locations.

Registration includes the following:

- Lunch
- NFPA #58 2017 edition book

Prerequisites:

CETP 1.0 Basic Principles & Practices

Our Instructor: Eric Leskinen is a veteran of the industry. Eric has over 30 years of experience with career progression from field operations to corporate direction. He has designed, managed, and executed safety training and compliance programs for multi-state companies with up to 1,100 employees. As a true compliance and safety specialist, his background and skill set is invaluable to propane marketers.
