## TECHNICAL TRAINING CENTER

# 2019 COURSE DATES

# Advanced AIRFLOW - NORA Gold

**Sept 18**

F.W. Webb Training Center  
1665 E. Race St  
Allentown, PA 18109  
484-488-3549

**9:00 am –4:00 pm**

The NORA Gold Airflow class will provide the information required to design, maintain, and test air distribution systems. Topics include: airflow static; velocity and total pressure; blowers: belt, direct and ECM, CFM and RPM; fan performance tables; and air distribution systems. Also included is system airflow and testing heat exchanges.

Efficiency and comfort are products of proper air flow. It doesn't matter what the SEER rating is if the airflow is not right. This is a quality, stand-alone airflow training program, but it is also included in the new NORA Gold certification program. Learn the proper way to test airflow systems while achieving or maintaining your NORA Gold Certification.

**Registration fees include the following complimentary items:**  
NORA Gold Venting Manual  
Lunch provided

**Our Instructor:** Ralph Adams is Service Manager for Parker Fuel. He is the President of OESP and for many years, the co-chair of the Education committee. Ralph co-authored the manual and corresponding training program for the NORA Gold Advanced Airflow and NORA Gold Venting programs.

**REGISTRATION FEE:**  
\$160/PPATEC Member  
\$200/Non Member
